

Controlling Cost And Quality Of

OCULOPLASTIC

Surgery*

* Maximizing pharmacoeconomic value (best health outcome for the resources invested)

HASA OPTIX
Belgium

Build your own oculoplastic set

Tailor-made: Build your own instrument set from a portfolio of 1200 instruments which allows surgeons to prepare ahead of time for success

Simplify: Reduce number of SKU's which contributes a better work environment for all stakeholders

Constant quality: HASA Optix offers a quality equivalent to reusable devices allowing surgeons to use them constantly

Environmentally friendly: Instrument sets are presented in a paper pouche avoiding heavy plastic inserts (only one pack and one sterilization)

Circular economy: We are building a recycling program to give a second life to the stainless steel our instruments are made of

Cost controlling: We are offering intergrated solutions to allow the calculation of a fixed cost per surgical act

Include your oculoplastic instrument sets in our oculoplastic procedure pack for better OR organization and cost controlling
